Patryk Skierkowski

Software Engineer II | .NET | jQuery | MySQL | Financial Applications
Kraków, Woj. Małopolskie, Polska

Podsumowanie

I am Patryk Skierkowski, a dedicated Cloud & Infrastructure Engineer with a deep specialization in .NET applications. My career has been driven by my passion for technology and innovation, particularly in the realm of cloud computing and infrastructure development. With a solid foundation in engineering principles, I have honed my skills to not only tackle technical challenges but also to think strategically about the deployment and optimization of complex systems.

My expertise extends beyond the technical realm; I am also proficient in React, allowing me to bridge the gap between backend services and frontend experiences, ensuring seamless, efficient, and scalable solutions. This unique combination of skills enables me to contribute to projects with a holistic understanding of both the underlying infrastructure and the user interface.

Beyond my technical abilities, I pride myself on my soft skills. Communication, teamwork, and problem-solving are at the core of my professional ethos. I believe that the most successful projects are the result of collaborative efforts, where open communication and mutual respect drive innovation and excellence.

Outside of work, I find joy and relaxation in cooking. This hobby allows me to explore creativity in a different realm, experimenting with flavors and techniques, which, in a way, parallels the creativity I apply in my professional projects. Cooking has taught me the importance of precision, patience, and improvisation—skills that are equally valuable in the world of cloud and infrastructure engineering.

I am always on the lookout for new challenges and opportunities to grow. Whether it's advancing cloud technologies, exploring new programming languages, or collaborating on innovative projects, I am eager to contribute my skills and continue learning in this ever-evolving industry.

Allvue Systems

Software Engineer II

sierpnia 2024 - Present (2 lata 1 miesiąc)

Kraków, Woj. Małopolskie, Polska

I work on developing and maintaining financial applications using technologies like .NET, jQuery, and MySQL. My responsibilities include designing and implementing new features, optimizing application performance, and ensuring the security and scalability of our software solutions. I collaborate closely with cross-functional teams to deliver high-quality financial products that meet the needs of our clients and stakeholders.
